

ROCKWELL LAND

ENVIRONMENT, SAFETY AND HEALTH VISION AND STRATEGIES

We, the management of Rockwell Land and its subsidiaries are committed to have an effective and integrated Environment, Safety and Health Management System in line with our vision to create admired communities beyond ordinary.

To be consistent with this vision, we will:

- administer our business with integrity by taking into account the protection and enhancement of the environment, and the education of safety and health awareness that is fair to the people and the community;
- develop and maintain a vigorous Environmental, Safety and Health Management System best suited to the property development industry thereby achieving excellence and maintaining leadership resulting in a healthy and friendly surrounding consistent with our business concerns;
- devise business-like and innovative programs as well as establish worthy standards that will continually improve working conditions and practices thereby gaining higher productivity and avoiding distress, damage to environment and financial loss; and
- establish a mindset that will challenge and motivate all staff, service providers, suppliers, business partners and clients to actively participate as a team and voluntarily conform to the Environment, Safety and Health programs, standards and regulations.

To realize these strategies, all levels of Rockwell Land's Management Teams shall maintain an active, responsive and collective participation in the Implementation of the Environment, Safety and Health Management System; making it part of our core values.

NESTOR J. PADILLA
President
